

# Howard Ave. unsafe for cyclists

The entirety of Howard Ave below Frontage Road on the way through the Hill is incredibly unsafe for cyclists. Motorists speed, fail to stop at red lights, throw trash onto the road. The entire right lane is made of potholes! This whole lane should be repaved.

And what of these rumors that the city has promised to create a bike lane on Howard Ave? Many cyclists as well as drivers use this road on their daily commute, and yet it looks like it hasn't been repaired in many long years.

Please fix the potholes! Please consider striping a bike lane! Please find ways to get motorists to slow down! Please clean up the heavily littered road (I've seen hypodermic needles lying in the gutter)!
